SUMMARY

Enthusiastic and detail-oriented software developer with expertise in software development, cloud computing, AI/ML, and quality assurance. Experienced in AWS, automation testing, and backend development. Strong problem-solving skills with a passion for optimizing systems for performance and scalability.

PROFESSIONAL EXPERIENCE

Cloud Systems Administrator Intern - Nebulane

August 26, 2024 - November 1, 2024

- Developed comprehensive expertise in AWS cloud services and SysOps administration through hands-on projects.
- Contributed to the management and optimization of AWS infrastructure, ensuring scalability, high availability, and efficient performance.

Quality Assurance Engineer – Vanrise Solutions

February, 2, 2025 - Present

- Conducted comprehensive testing on Ogero's CRM system, identifying and reporting bugs to enhance software stability and functionality.
- Developed and implemented automation scripts to optimize testing processes and improve efficiency.
- Executed automation for monkey testing and user story scenarios to ensure a seamless user experience.

EDUCATION

Lebanese University - Faculty of Science

2021-2024

- Bachelor's Degree in Computer Science

Certifications

- | | |
|--|--------------|
| • AWS SysOps Administrator Certificate | Nov 11, 2024 |
| • AWS AI Practitioner Certificate | Apr 8, 2025 |

SKILLS

- Programming Languages: C, Java (Data Structures), HTML, CSS, C#, JavaScript, PHP, Python, Dart
- Databases: MySQL, SQL, MongoDB
- AI & Machine Learning: AI Fundamentals, AWS AI Services (e.g., SageMaker, Rekognition, Comprehend)
- Testing & Quality Assurance: Manual Testing, Automated Testing (Selenium, PyTest), Monkey Testing, API Testing
- Frameworks: ASP.NET Core (WebAPI, Razor Pages), React.js, Spring Boot, Flutter
- Version Control: Git, GitHub
- Operating Systems & Tools: Linux (Command Line), Bash Scripting
- Cloud Computing: AWS (Amazon Web Services)
- Geographic Information Systems (GIS): ArcGIS

PROJECTS

- PHP & MySQL Development: Designed and implemented secure, scalable web applications demonstrating backend development and database management skills
- Slack Clone: Created a Slack clone using React, styled-components, and Firebase for hosting, incorporating real-time messaging features.
- Full Stack Movie App: Developed a full-stack app with Java Spring Boot, React, and MongoDB for viewing trailers and posting reviews.
- Portfolio Website: Designed a responsive personal portfolio with Node.js, React, and Tailwind CSS to showcase projects and achievements.
- Flutter E-commerce App & To-Do List: Developed an E-commerce app and a To-Do List app with Flutter, integrating dynamic features and secure user authentication
- Python AI Projects: Worked on AI-driven applications including sentiment analysis and object detection, leveraging Python for data processing and model implementation
