SUMMARY

Detail-oriented Quality Assurance Engineer with hands-on experience in manual testing, automation testing using Playwright and Selenium, and performance/load testing (k6). Strong background in backend development, cloud computing (AWS), and AI-powered applications. Experienced in designing regression test suites, validating APIs, and ensuring high product reliability across releases. Passionate about clean architecture, scalable systems, and delivering high-quality software through structured testing strategies.

PROFESSIONAL EXPERIENCE

Product Specialist - Publicis Groupe

Sep 2025 - Present

- Executed manual and automated tests using Selenium for core CRM features and user workflows.
- Performed API testing and regression testing to validate new releases and prevent recurring issues.
- Reported and tracked bugs using internal QA tools, collaborating with cross-functional teams to ensure product quality and alignment with business goals

Quality Assurance Engineer - Vanrise Solution

Feb 2025 - July 2025

- Executed manual and automated tests using Selenium for core CRM features and user workflows.
- Performed API testing and regression testing to validate new releases and prevent recurring issues.
- Reported and tracked bugs using internal QA tools, collaborating with cross-functional teams to ensure product quality and alignment with business goals

Cloud Systems Administrator Intern - Nebulane

Aug 2024 - Nov 2024

- Assisted in managing and optimizing AWS infrastructure environments.
- Worked with AWS services including EC2, S3, IAM, and monitoring tools.
- Supported system availability, performance tuning, and infrastructure reliability initiatives.

EDUCATION

Lebanese University – Faculty of Science

2021 - 2024

- Bachelor of Science in Computer Science

CERTIFICATIONS

- | | |
|-----------------------------|-----------------|
| • AWS SysOps Administration | Dec 15 - 2025 |
| • AWS AI Practitioner | April 08 - 2025 |

SKILLS

- Languages:** C, Java, Python, JavaScript, TypeScript, C#, PHP, HTML/CSS, Dart
- Frameworks & Libraries:** ASP.NET Core, Spring Boot, React.js, Next.js, Flutter, Node.js
- Databases:** MySQL, SQL, MongoDB
- Testing:** Playwright, K6, PyTest, API Testing, Manual & Automation
- Cloud & DevOps:** AWS (EC2, S3, IAM), Bash, Linux
- Others :** ArcGIS, MATLAB, AWS AI Services, AI/ML, Git, GitHub

PROJECTS

- **Playwright Automation Framework** – Built a scalable end-to-end test automation framework using Playwright, covering UI workflows, regression testing, and CI-ready execution.
- **k6 Performance Testing** – Implemented load and performance tests using k6 to evaluate system stability, response times, and scalability under concurrent traffic conditions.
- **DeepSeek Chat App** – Full-stack AI assistant using Next.js, Clerk (auth), React, and Vercel.
- **Movie Review App** – Full-stack project with Spring Boot, React, MongoDB.
- **Portfolio Website** – Node.js, React s Tailwind-based portfolio site.
- **Flutter Apps** – E-commerce s To-Do List with Firebase auth s responsive UI.
- **AI Projects (Python)** – AI Chatbot, Sentiment analysis, object detection using ML libraries.
- **PHP/MySQL Web App** – Backend-focused CRUD app with secure database ops
